

NOTICE TO MARINERS

DUDGEON OFFSHORE WIND FARM CONSTRUCTION WORKS

NOTICE IS HEREBY GIVEN that construction activities are in progress at the Dudgeon Offshore Wind Farm and Export Cable Corridor.

Foundation installation is completed and the Offshore Substation (OSS) has been installed. The vessel SEA Challenger will be used for accommodation at the OSS location and will later perform the wind turbine generator installation onto the Wind turbine foundations (TP and MP). Work is ongoing and planned to be completed in Q3, 2017

The Vessel Njord Esvagt will be performing preparation support for operation and will be in regular transit between the Dudgeon windfarm area and port. This will start in September and continue during the field operation.

Cable protection work

The Grand Canyon will be performing burial of the Inter Array Cables and for the unprotected section of the export cable (ref. p6). This operation is ongoing and expected to be completed late November, 2016.

Guard vessel

The Adventure will act as a guard vessel to safe guard the wind farm area. During port calls, Advance will be her back-up. Adventure will be on location from end April expected to be completed late October.

The Rachael S will act as guard vessel at the cable jointing location until splice is trenched and adequate protection by burial is confirmed.

The vessel Vestland Cygnus will be used for personnel accommodation at the Dudgeon field area, and for transfer off personnel based on “walk to work” onto TP’s and the OSS. Vestland Cygnus is on location and will be operating in the field until late 2016.

Vestland Cygnus is supported by personnel transfer vessels

Commissioning activities

For the commissioning work there are several Crew transfers vessels that operate in the field on a daily basis. This activity is ongoing and will continue until commissioning is completed in 2017.

GENERAL

MARINERS ARE HEREBY INFORMED that a statutory construction Safety Zone (exclusion zone) is in place at the wind farm site. This safety zone is defined by:

A 500 metres radius around each wind turbine, offshore sub-station and their foundations whilst work is being performed as indicated by the presence of construction vessels; and

A 50 metres radius around each wind turbine, the offshore sub-station platform and associated foundation structures installed, complete or incomplete but waiting to be commissioned as part of the Dudgeon offshore wind farm where personnel are present on, or are being landed on or being taken from, the structures.

All vessels will exhibit appropriate lights and shapes prescribed by the International Regulations for Preventing Collisions at Sea.

ALL VESSELS ARE REQUESTED to give all construction and support vessels a wide berth.

MARINERS ARE ADVISED to navigate with caution and keep continued watch on VHF Ch. 16 when navigating the area.

A further notice to mariners will be issued when these works are completed, expected autumn 2016.

**Please direct any enquiries regarding this notice to:
Statoil Wind Control Centre - statoilwindcontrol@statoil.com**

GUARD VESSEL LOCATION

Unprotected section of the Export Cable.

There is an unprotected section of the export cable on the seabed awaiting confirmation of adequate protection by burial. This location is defined by the following area:

Cable End: 381789 E, 5877403 N / 53° 01.984' N, 001° 14.229' E

Clump Weight: 381808 E, 5877449 N / 53° 02.009' N, 001° 14.244' E

Holdback anchor / Marker buoy for initiation clump weight

Clump Weight: 381582 E, 5877163 N / 53° 01.853' N, 001° 14.048' E

Cable End: 381621 E, 5877206 N / 53° 01.876' N, 001° 14.082' E
